	<b>Personnel:</b>	E. Moreau (Security Designer)

**Service Description:**

The goal of the security design is to provide a safe, secure environment for occupants of the facility and to provide protection for the owner’s assets. The security design includes an integrated electronic security system to facilitate the protection of the facility, its occupants and assets as it relates to the new facility. This includes seamlessly integrating the access control and video surveillance systems while making the appropriate upgrades to the existing system. This will include a new command center within the new facility.
